Office Action Summary	Application No. 09/737,841	Applicant(s) GORDON ET AL.	
	Examiner Romain Jeanty	Art Unit 3623	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 23, 2006 has been entered. Claims 1-5, 7-12, 16, 18, 21-24, and 29.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 4-13, 16, and 18 are rejected under 35 U.S.C. 102(b) as being unpatentable over Herz et al "Herz" (US Patent No. 5,758,257) in view of Alexander et al "Alexander" (US Patent No. 6177931).

As per claims 1, 4-9, 11-13, 16, 18, Herz discloses a system and method for scheduling broadcast of and access to video programs and other data using customer profiles. In so doing, Herz discloses propagating, via a forward application transport channel (FATC), a plurality of video streams representing respective pages of an interactive program guide (IPG), each IPG page depicting programming associated with a

respective pair of channel groups and time slots (col. 10, lines 6-20 and col. 24 line 56 through col. 25 line 6), polling the plurality of terminals for trend data (col. 6, line 56 through col. 7 line 5; and col. 41, lines 42-56), receiving via a back channel, subscriber selections associated with at least one IPG page (col. 6 line 56 through col. 7 line 5 and col. 43, lines 3-12), determining trend data associated with accumulated subscriber selection, and adapting at least one IPG page in response to said determined trend data (col. 45. lines 34-55). Herz fails to explicitly disclose “wherein the selections associated with the at least one IPG page comprise a plurality of remote control key presses associated with navigation by a user about the at least one IPG page and a plurality of actions performed in response to the key presses”. However, Alexander in the same field of endeavor, teaches the concept of a user to select a plurality of remote control key presses associated with navigation by a user about the at least one IPG (EPG) page and a plurality of actions performed in response to the key presses (col. 3, line 21 through col. 4, line 61). Therefore, it would have been obvious to a person of ordinary skill in the art at the time of the applicant’s invention to modify the disclosures of Herz to include the teachings of Alexander in order to improve viewer interaction capabilities with the EPG.

As per claim 10, Herz further discloses wherein the subscriber selections include a selection for a particular filter icon from among a plurality of filter cons provided in a user interface presented at a set top terminal (col. 29, lines 31-51)

4. Claims 2-3, 21-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Herz et al “Herz” (US Patent No. 5,758,527) in view of Alexander et al “Alexander” (US Patent No. 6,177,931) and further in view of Hendricks et al “Hendricks” (US Patent No. 5,659,350).

Art Unit: 3623

As per claims 2-3, 21-24, the combination of Herz and Alexander does not explicitly disclose the concept of stamping each event with a time of occurrence for the event. Hendricks in the same field of endeavor discloses the concept of stamping an event with a date and time (col. 29, lines 34-36). It would have been obvious to a person of ordinary skill in the art to modify the disclosures of Herz and Alexander to include stamping an event with a date and time as evidenced by Hendricks in order to allow for the organizing and packaging of television programs for transmission in a television delivery system.

Remarks

5. Applicant has amended independent claim 1 to recite the feature of “wherein the selections associated with the at least one IPG page comprise a plurality of remote control key presses associated with navigation by a user about the at least one IPG page and a plurality of actions performed in response to the key presses”, and has argued that Herz does not teach such added limitations. Applicant is directed to (col. 3, line 21 through col. 4, line 61) to US Patent No. 6,177,931 for this claimed feature.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Yuen (WO9734414) discloses displaying video programs and related text simultaneously on a television screen.
